- Characterised by consumerisation of IT and collaborative workplaces
- Offering improved productivity and collaboration with digital tools

WHAT IT OFFERS

Consistent user experience

Secure access

Intelligence and automation

Unified endpoint management

Business resilience

Intelligent SSO

Emerging need: Hybrid Work Model

There is a strategic move towards hybrid work model.

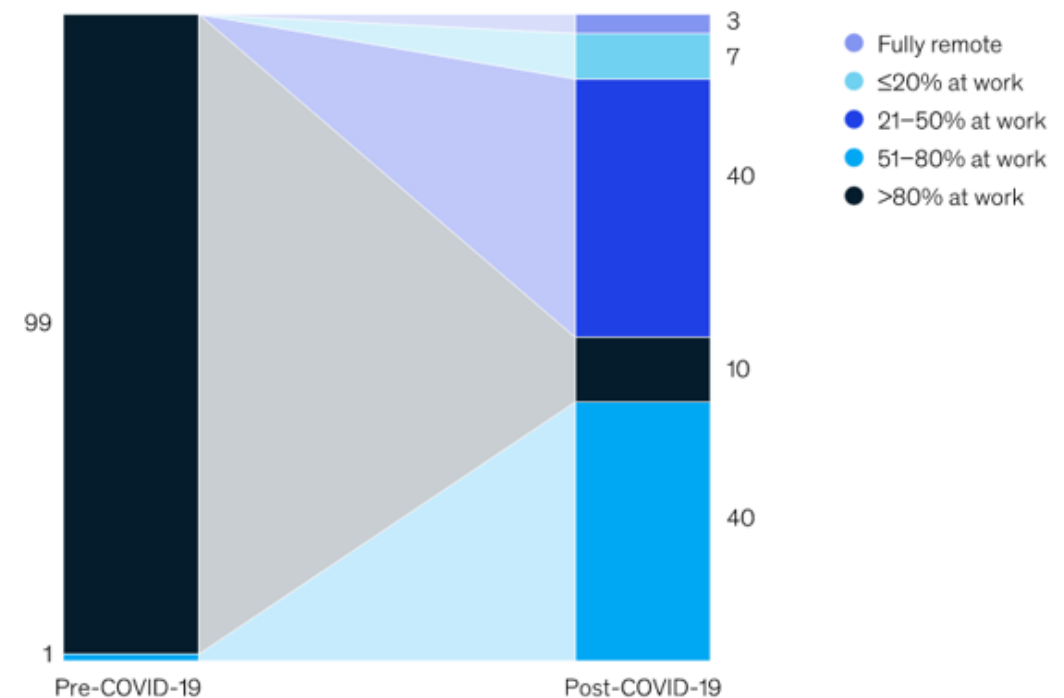

Business continuity and resilience have become a priority.

Post pandemic, nine out of ten organisations will be combining remote and on-site working.

Most executives expect that employees will be on-site between 21 and 80 percent of the time, or one to four days per week.

In the post-COVID-19 future, C-suite executives expect an increase in hybrid work.

Past and future expectations of time spent at work location,¹ % respondents

¹Question: What level of remote working (for roles typically associated with being office-based) does your organization have?
